

RAPHAEL E. DACARA

Mobile Developer | Full Stack Developer

Santa Maria, Bulacan, Philippines | raphaeldacara62@gmail.com | +63 999 316 1582 | linkedin.com/in/raphaeldacara19up

PROFESSIONAL SUMMARY

Mobile and full stack developer with 2+ years of experience building, deploying, and maintaining Flutter mobile applications for iOS and Android and web applications. Skilled in Firebase, REST API and Laravel service integration, Node.js, PostgreSQL, and Docker-based deployment. Experienced in app store release preparation, crash reduction, performance optimization, and working with QA, backend, and product teams. Magna Cum Laude graduate in Information Technology.

WORK EXPERIENCE

Mobile Developer InventAsia Ltd.

July 2026 – Present

- Develop Flutter mobile applications for iOS and Android, delivering assigned features, enhancements, bug fixes, and technical improvements.
- Integrate mobile apps with backend REST APIs, Laravel-based services, and authorized third-party SDKs.
- Implement Firebase integration and monitoring, including Crashlytics, Analytics, and logging, to support diagnostics and app stability.
- Optimize mobile performance, responsiveness, and stability, and reduce crashes in production.
- Investigate and fix mobile defects, regressions, compatibility issues, and user-reported problems.
- Prepare App Store and Google Play builds, including versioning, configuration checks, release-readiness notes, and submission materials.
- Write implementation notes, handover notes, technical documentation, and code maintenance records for assigned work.
- Collaborate with the Senior Mobile Engineer, QA, backend, AI, integration, and product stakeholders on code review, release readiness, and codebase consistency.

Jr. Full Stack Developer

Centralized Cloud Computing Inc., Makati City

September 2024 – June 2026

- Supported and maintained mobile and web applications.
- Deployed code to servers using Git, Docker, and Nginx.
- Deployed mobile applications to Google Play and the Apple App Store.
- Worked with clients to address system concerns and resolve issues promptly.
- Tested APIs using Postman and Thunder Client.
- Built backend features with PostgreSQL and Express.js, including authentication mechanisms, and automated workflows with n8n.
- Used Firebase and Socket.IO for real-time communication in mobile applications.
- Contributed to mobile game development.

Web Designer / SEO Intern

Online Thinkers Technology, Valenzuela City

April 2024 – July 2024

- Built and customized WordPress sites, including installing, activating, and troubleshooting plugins.
- Created design templates and themes for client business needs and implemented them using Elementor.
- Managed posts, pages, menus, and the media library.
- Optimized website SEO for better search ranking.

PROJECTS

E-LIGTAS: Web and Android-Based Mobile Application for Emergency Response and Disaster Preparedness Programmer / Developer

- Developed and managed the code for the mobile side of the system.
